

LIMONE FEMMINELLO SIRACUSANO 2KR

EPOCA DI MATURAZIONE

JANUARY	FEBRUARY	MARCH 	APRIL 	MAY 	JUNE 
JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER

FRUIT TRAITS

SHAPE	elliptic	FLESH COLOUR	greenish yellow
WEIGHT	150 g	JUCINESS	high
RIND COLOUR	greenish yellow	SEEDS	numerous
RIND	slightly papillated		
RIND THICKNESS	medium		

PLANT

GRONOMIC TRAITS

PRODUCTIVITY	high
ALTERNATION	absent
TOLERANCE TO MAL SECCO	low
PERSISTENCE OF RIPE FRUITS	medium

VEGETATIVE TRAITS

ENERGY	high
SPININESS	slightly present
BEARING FOLIAGE	slightly assurgent slightly expanded

ORIGIN

Clone derived from radiation-induced nuclear tissue mutation of Co60. It was selected at the CRA-Istituto Sperimentale per l'Agrumicoltura of Acireale in 1970.

SINTHETIC CONSIDERATION

This fin quality cultivar is very appreciated on the market for its high productivity and for the fruit's early growth; anyway, it shows some defects: for example, it can't tolerate dry weather and wind.
