

ARANCIA PIGMENTATA MORO NL 58-8D-1

AVAILABILITY

JANUARY 	FEBRUARY 	MARCH	APRIL	MAY	JUNE
JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER 

FRUIT TRAITS

SHAPE	ovoid	PEELING	medium
WEIGHT	180 g	FLESH COLOUR	deep red
RIND COLOUR	deep red	JUICINESS	medium
RIND	slightly papillated	SEEDS	absent
RIND THICKNESS	medium		

PLANT

AGRONOMIC TRAITS

PRODUCTIVITY	High
ALTERNATION	Present
PERSISTENCE OF RIPE FRUITS	Medium

VEGETATIVE TRAITS

ENERGY	medium
SPININESS	medium
BEARING	assurgent
FOLIAGE	compact

ORIGIN

The Moro variety was selected at the CRA-Istituto Sperimentale for the Acireale citrus cultivation in 1958.

SYNTHETIC CONSIDERATION

The "Moro" is the most colourful orange, with a deep red flesh and rind. It is the variety that traditionally feeds the export flow to European countries.
