

# NECTARINES

## DETAILS

### HARVESTING

EARLY: from mid-May to mid-June  
late: from mid-August to September  
LATE: from mid-August to September  
Italy, Sicily

### WHERE TO PLANT

### TRAITS

Peaches are healthy, free of pests, clean, sufficiently riped, free of abnormal moisture, smell and/or taste. The refractometric index of the flesh must be  $> 8^{\circ}$  Brix

### DIAMETER

High vigour and productivity

**FRUIT:** The nectarine variety has medium sized fruits (130 g of average weight - size A) with a slightly elongated shape. The skin is yellow and red (90 - 100% of the surface). The flesh has a good, yellow consistency.

It is very juicy, with a semi-sweet taste and a high sugar content.

**ORIGIN:** Italy

Calibration scale for peaches and nectarines:

#### AAA

from 80 mm to 90 mm diam.  
from 25 cm to 28 cm circ.

#### AA

from 73 mm to 80 mm diam.  
from 23 cm to 25 cm circ.

#### A

from 67 mm to 73 mm diam.  
from 21 cm to 23 cm circ.

#### B

from 61 mm to 67 mm diam.  
from 19 cm to 21 cm circ.

## CALIBRATION TOLERANCES

For AAA, AA, A classes, a total tolerance of 5% is allowed.  
For B size, a total tolerance of 10% is allowed.
