

ARANCIA PIGMENTATA TAROCCO GALLO NL C 898

AVAILABILITY

JANUARY 	FEBRUARY 	MARCH 	APRIL	MAY	JUNE
JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER 

FRUIT TRAITS

SHAPE	obovoid	PEELING	medium
WEIGHT	200 gr	FLESH COLOUR	red
RIND COLOUR	red	JUICINESS	high
RIND	slightly papillated	SEEDS	absent
RIND THICKNESS	medium		

PLANT

AGRONOMIC TRAITS

PRODUCTIVITY	high
ALTERNATION	absent
PERSISTENCE OF RIPE FRUITS	medium

VEGETATIVE TRAITS

ENERGY	medium
SPININESS	low
BEARING	assurgent
FOLIAGE	expanded

ORIGIN

The Gallo variety was selected at the CRA-Istituto Sperimentale for the Acireale citrus cultivation in 1985. It is known among farmers as "Supergallo".

SYNTHETIC CONSIDERATION

This variety is the most highly valued orange, due to its colour and properties. It has a highly pigmented pulp; on the other hand, the skin does not reach high anthocyanin pigmentation.
