FRUIT TRAITS

SHAPE	obovoid	PEELING	medium
WEIGHT	200 g	FLESH COLOUR	deep red
RIND COLOUR	deep red	JUICINESS	high
RIND	slightly papillated	SEEDS	absent
RIND THICKNESS	medium		

PLANT

AGRONOMIC TRAITS		VEGETATIVE TRAITS	
PRODUCTIVITY	high	ENERGY	medium
ALTERNATION	absent	SPININESS	absent
PERSISTENCE OF RIPE FRUITS	medium	BEARING	assurgent
		FOLIAGE	expanded

ORIGIN

The Ippolito variety was selected and healed at the DOFATA- University of Catania in 1998.

SYNTHETIC CONSIDERATION

The fruit has deep red flesh and rind. Its excellent flavour is due to a harmonic contrast between sugars and acids.

The anthocyanin pigmentation of the flesh is very pronounced.
