

ARANCIA PIGMENTATA TAROCCO TAPI

AVAILABILITY

JANUARY 	FEBRUARY 	MARCH	APRIL	MAY	JUNE
JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER 

FRUIT TRAITS

SHAPE	obovoid	PEELING	medium
WEIGHT	210 g	FLESH COLOUR	deep red
RIND COLOUR	red	JUICINESS	high
RIND	slightly papillated	SEEDS	absent
RIND THICKNESS	medium		

PLANT

AGRONOMIC TRAITS

PRODUCTIVITY	high
ALTERNATION	absent
PERSISTENCE OF RIPE FRUITS	medium

VEGETATIVE TRAITS

ENERGY	high
SPININESS	medium
BEARING	assurgent
FOLIAGE	expanded

ORIGIN

Tarocco Meli variety was selected at the CRA-Istituto Sperimentale per l'Agrumicoltura di Acireale in 1975. Its name comes from the initials of "Tarocco Arcimusa Pigmentato".

SYNTHETIC CONSIDERATION

This variety ripens early and the fruit holds well on the tree, allowing the harvest to be protracted until mid-February.

The seedless flesh is deep red and very juicy.
