

ARANCIA OMBELICATE WASHINGTON NAVEL 3033

AVAILABILITY

JANUARY 	FEBRUARY 	MARCH 	APRIL	MAY	JUNE
JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER 

FRUIT TRAITS

SHAPE	spheroidal	PEELING	medium
WEIGHT	220 g	FLESH COLOUR	orange
RIND COLOUR	orange	JUICINESS	medium
RING	smooth	SEEDS	absent
RING THICKNESS	medium		

PLANT

AGRONOMIC TRAITS

PRODUCTIVITY	high
ALTERNATION	absent
PERSISTENCE OF RIPE FRUIT	high

VEGETATIVE TRAITS

ENERGY	high
SPININESS	low
BEARING	assurgent
FOLIAGE	expanded

ORIGIN

This variety is a nucellar seedling selection made by Front at the Citrus Research Center, Riverside, California in 1933.

SINTHETIC CONSIDERATION

Known for its good organoleptic characteristics, Washington Navel orange is very appreciated in some southern markets of Italy (Calabria, Basilicata, Puglia, Sardinia), where there are still margins expansion.
